

Quick Guide – Version 4.5

Left Soft key

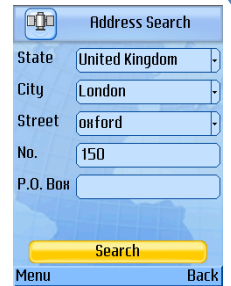

Right Soft key

Select Button

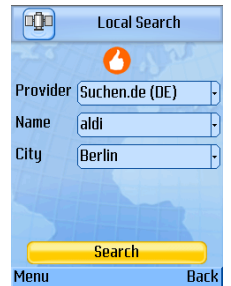

Address Search

- Enter the **search > Address** menu
- Type in the address and click **search**
- Select the relevant result from the list
- Select the option you want (navigate there, see it on the map, etc.)

Local Search

- Enter the **search > Local search** menu
- Select the preferred directory provider
- Type in the business name, category and city and click **search**
- Select the relevant result from the list
- Select the option you want (navigate there, see it on the map, etc.)

Installation

- For Amaze to use GSM data network, you need to configure the correct APN for Profile5
- Open the Java box (under **Menu > Applications > JAVA**)
- Select **Options > Embedded Applications > amAzeGps.jad**
- After installation, select **amAze** in Java box to run amAze
- Set language during first run

Weather

- The current weather conditions in the map area are displayed as a default on every map
- To see forecast for next 5 days go to **search > weather**
- Enter the relevant location (by GPS, address, favorites) and click **search**

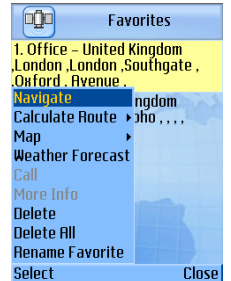

Navigation

- Few options to start a navigation:
 - Via the main **Route** menu
 - Or directly from any searched result (address, POI) by using the **side menu** and selecting **navigate to**
 - Or select any map center as navigation destination using the **side menu**

Favorites

- You can add search result to the favorites list via the **side menu**
- Give your favorite a name
- Under main menu **Favorites** select the relevant item from your personal list
- Select the option you want (navigate there, see it on the map, call, etc.)

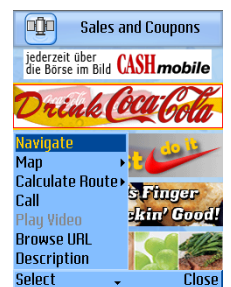

3D / 2D / Arrows Nav

- The default navigation mode is with arrows (the most economical on data)
- Click on the **right soft key** to change to 2D map (you can also change map type from the **side menu** and zoom level from the **select button**)
- Click again on the **right soft key** to change to 3D map

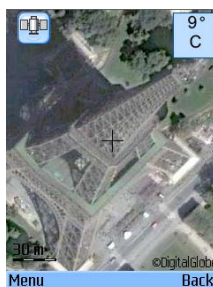

Ads and Coupons

- You can see more information on any of the ads displayed on the screen
- Go to **search > Sales and Coupons**
- Select the relevant ad with the **select button**
- Select the option you want (navigate there, see it on the map, call, etc.)

Maps/Satellite

- View any searched item on the map via the **side menu**
- Select between street map / hybrid / aerial photo
- Zoom in/out by clicking on the **joystick**
- Center map on GPS or add map center to favorites via the **side menu**

Got more questions?
