

About Sonim Technologies, Inc.

Sonim Technologies enables today's GPRS, UMTS & WiFi data networks to deliver high-performance VoIP applications and services, specifically optimised to meet the productivity objectives of mobile enterprises. Sonim's OMA PoC 1.0 server, client and handset solutions represent the industry's only business class implementation of the push-to-talk standard and form the basis of an emerging suite of streaming IMS-compliant applications. Sonim is headquartered in San Mateo, California, with offices in Bangalore, London, Stockholm and Madrid. For more information, visit the company's web site at www.sonimtech.com
