

You go places that others will not.

**Mobile Broadband Kit – Elite
(MBK-Elite)**

Expect no less of your communication.

Introducing Mobile Broadband Kit - Elite

Forest fires. Disaster areas. The places first responders go often have impaired connectivity, if any at all.

That all changes with MBK-Elite. This ultra-rugged, all-in-one portable communications solution provides emergency and public safety teams with reliable access and connectivity, in even the most dangerous and remote mission critical situations.

- 1 Ultra-rugged, portable and self-contained**, this rapid deployment kit has everything your team needs to stay connected and coordinate efforts.
- 2** Four of the world's most rugged smart devices, **Sonim XP8s**, give teams confidence to enter any emergency situation without fear of device failure.
- 3 Cellular, GPS and WiFi antenna** create a ~700 ft "connectivity bubble", establishing reliable communications.
- 4** Optional intelligent failover to reliable satellite capability enables communication when no other coverage is available.
- 5** With an internal, **100 Wh battery**, teams are constantly aware of power/charge levels at all times.
- 6 Cradlepoint LTE router and modem** creates a secure, reliable data communications hub failover to satellite provided by Inmarsat.
- 7** Optional gateway interfaces LMR talk channels to all leading PPToC providers. It supports Backhaul for RoIP, SIP and RTP for versatile VOIP capabilities.

* satellite equipment and service sold separately.
