

Sonim Solutions
/Construction

Because the most powerful tool on any worksite is communication.

Stay productive and safe with the rugged mobility solutions that keep you connected, **wherever the workday takes you.**

Loud equipment, dangerous materials, strict regulations, communicating in the construction environment is challenging. You need technology solutions that can get the job done wherever, however, whenever.

More powerful than your traditional radios, Sonim devices are professional power tools of communication that thrive on the construction site.

From their impact-, dust-, and chemical-resistance, ultra-rugged design, to their long-lasting battery and even longer-lasting warranty, Sonim keeps your crews seamlessly connected, productive, and safe.

Construction partners prefer the Sonim XP5plus and XP10
